

Vegetation Density and Emotional Resilience: The Role of Greenness in Reducing Negative Affectivity in South Korea

Table A1. Data information (District level)

	Data	Description	Source
1	Vegetation Density Indices (EVI, NDVI)	<p>For NDVI and EVI, which are designed to minimize canopy background variations and maintain sensitivity in densely vegetated areas, we utilized the MODIS/Terra vegetation indices product (MOD13Q1.061). This product offers a spatial resolution of 250 meters and a temporal resolution of 16 days. The greenness data derived from these satellite-based indices were aggregated to yield mean annual values for each administrative district.</p> <p>(a) Enhanced Vegetation Index (EVI): EVI is designed to optimize the vegetation signal by correcting for canopy background signals and reducing atmospheric influences, including those from aerosols. EVI is particularly useful in areas with dense vegetation, where it improves sensitivity to variations in vegetation. The formula for EVI is:</p> $EVI = G \times \frac{(NIR - RED)}{NIR + C_1 \times RED - C_2 \times BLUE + L}$	MODIS/Terra vegetation indices product (MOD13Q1.061)

		<p>Where NIR is the near-infrared reflectance, RED is the red reflectance, BLUE is the blue reflectance, L is the canopy background adjustment, and G, C₁, and C₂ are coefficients.</p> <p>(b) Normalized Difference Vegetation Index (NDVI): NDVI is a widely used index that measures the difference between near-infrared (which vegetation strongly reflects) and red light (which vegetation absorbs). NDVI values range from -1 to +1, with higher values indicating healthier and denser vegetation. The formula for NDVI is:</p> $NDVI = \frac{(NIR - RED)}{(NIR + RED)}$	
2	Income	Average Income	Democratic Party (https://idp.themijoo.kr/board/view/press/2128)
3	Homeownership	$\frac{\text{Households with their own houses}}{\text{Households without their own houses}}$	Korean Statistical Information Service
4	Age	Average age of population	Ministry of the Interior and Safety of South Korea
5	Sex	$\frac{\text{Male population}}{\text{Female population}}$	Korean Statistical Information Service

6	Urbanization	<u>Population living in urban area</u> Population	Ministry of Land, Infrastructure and Transport of South Korea
